### ZOYSIA GRASS

25A17—New, hot weather hybrid grass selected and developed by U. S. Dept. of Agr. and U. S. Golf Association. No seed is available and it must be propagated by rhizomes or plugs. For those who want a good green lawn during hot-weather. Grows well in most all soils, dense and thick. The best method for transplanting is by planting 2 inch plugs in checker board fashion, 1 ft. square. These plugs will cover and make a dense turf in two growing seasons in a lawn where other grasses are established. In open area where no competition from other vegetation, if planted and fertilized, will usually cover in one season. The cost of plugging entire lawn is prohibitive to average home owner so we advise buying 100 to 200 plugs and replanting as Zoysia spreads. 100 Besturf Brand Meyer Z-52 Zoysia plugs, plugging tool, fertilizer and planting instructions, ... \$15.00. 2 pkgs. containing 160 plugs each (total 200 plugs), plus 1 plugging tool and fertilizer, \$28.50.
